Subject: additional HE EI info needed for South Dayton Dump & Landfill
Importance: High

Hi Leslie,

As a result of the environmental indicator (EI) paragraphs being made public (and HQ requesting specific information be included in these paragraphs), some additional information is needed for the Human Exposure EI paragraph for your site, as shown in the attached spreadsheet (see the comments in blue). An additional sentence or two added to the red revised paragraph to address the comments would be appreciated (the paragraph format should not be changed).

Your site is: South Dayton Dump & Landfill

Would you please provide the requested additional information by Friday July 8?

Please contact me if you have any questions.

Thank you,
Bonnie
